

Assignment: Data Infrastructure at Meta

CSE 817: Data Engineering

Research and write a detailed note on the data infrastructure at Meta. You will use the link provided below as your primary resource and present your findings in a video presentation. Your submission should reflect your own understanding and analysis of the material.

Instructions

1. **Research:**

Visit the link: [Meta Data Infrastructure](#) to explore Meta's data infrastructure and understand the systems, technologies, and approaches used.

2. **Written Note:**

Write a comprehensive note summarizing the key aspects of Meta's data infrastructure. Highlight specific tools, architectures, and strategies that Meta employs to manage, store, and analyze data at scale.

3. **Video Presentation:**

Create a 5–7 minute video summarizing your research findings. Your presentation should be clear, well-organized, and demonstrate a strong understanding of the topic.

4. **Submission:**

Share a URL to your video presentation. Ensure the link is accessible and that the video can be viewed by the instructor.

Guidelines

- The work must be your own. Do not rely on AI tools or external help to generate your content. Any form of plagiarism or dishonesty will result in penalties.
- Your note and video should reflect your original analysis and understanding of the material.
